Storing Tips & Hints

PREPARING FOR STORAGE

General Tips

- When packing boxes place heavier items on the bottom, lighter on the top.
- Store similar items together.

Furniture and Paintings

- Disassemble furniture/bedding, pack and label bolts and nuts separately from the main item.
- Place furniture/mattress covers to protect your valued goods.

White Goods

- All white goods need to be clean and dry before storing.
- Leave your white goods empty to avoid scratches inside or any other damage.

MOVING INTO A STORAGE UNIT

Plan Carefully

- Planning to access your items frequently? Create a central aisle down the centre of your unit.
- Not planning to access your storage unit often? Utilise as much floor space as possible by starting right at the back of your storage unit.

Utilise All Space

- Pack all the way to the top of your unit or use plywood over several boxes to create stable layers.
- Bigger items such as mattresses, lounges should be placed on sides along the storage unit walls.

Avoid Damage

- Laying a plastic sheeting down before you pack your unit will help avoid condensation damage.
- Leave fridge, washing machine or freezer's door slightly ajar to prevent mould build up.
